Key Information Document (“**KID**”)

Purpose

This document provides the investor with key information about this investment product. It is not marketing material. The information is required by law to help the investor understand the nature, risks, costs, potential gains and losses of this product and to help the investor compare it with other products.

Product

Bonus Certificate in CHF on Abbott Laboratories, Intuitive Surgical, Philips

Swiss Securities Number: 153512793 | ISIN: CH1535127935 | SIX Symbol: AEHHSQ
Issuer: **Swissquote Bank SA**
PRIIP Manufacturer: **Leonteq Securities AG** | The PRIIP Manufacturer is part of the Leonteq Group. | www.leonteq.com | Call +41 58 800 1111 for more information | Competent Authority: Not Applicable. The PRIIP Manufacturer is domiciled in Switzerland and is subject to prudential supervision by the Swiss Financial Market Supervisory Authority (“FINMA”). FINMA is not considered a competent supervisory authority under EU Regulation 1286/2014 on Key Information Documents for Packaged Retail and Insurance-based Investment Products (PRIIPs). | Date of production of the KID: 24.11.2026

The investor is about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type
This product is a Swiss Uncertificated Security under Swiss law.

Term
The term of the product ends on the Redemption Date, unless the product has been terminated early.

Objectives
Objective of the product is to provide the investor with a specified entitlement according to predefined conditions. The product has a fixed lifetime and will be redeemed on the Redemption Date. The possibilities for the redemption of the product are as follows:

- If a Barrier Event has not occurred and
  (1) If the Final Fixing Level of the Underlying with the Worst Performance is at or below the respective Initial Fixing Level multiplied by the Bonus Level (in %), the investor will receive a Cash Settlement in the Settlement Currency that equals the Bonus Amount.
  (2) If the Final Fixing Level of the Underlying with the Worst Performance is above the respective Initial Fixing Level multiplied by the Bonus Level (in %), the investor will receive a Cash Settlement in the Settlement Currency which equals the Denomination multiplied by the Worst Performance.
- If a Barrier Event has occurred, the Investor will receive a round number (i.e. Conversion Ratio) of the Underlying with the Worst Performance per Product. Any potential fractional Conversion Ratio entitlements (Fractions of the Underlying) will be paid in cash, based on the Final Fixing Level.

A Barrier Event shall be deemed to occur if at least one of the Underlyings' Final Fixing Levels is at or below the respective Barrier Level.
The investor might incur a loss in case the sum of the value of the delivered Underylings on the Redemption Date and the Fractions of the Underlying is below the purchase price of the product. Different from a direct investment in the Underlyings, the investor will not profit from dividend payments nor any further entitlements resulting from the Underlyings (e.g. voting rights). The investor will benefit from a positive performance of the Underlyings as long as the Barrier Event has not occurred.

Subscription Period	24/11/2026 - 01/12/2026, 14:00 CET	**Currency of the product (Settlement Currency)**	Swiss Francs ("CHF")
Minimum Investment / Minimum Trading Lot	CHF 1’000.00	**Issue Date**	09/12/2026
Initial Fixing Date	01/12/2026	**Last Trading Day/Time**	01/06/2028 / Exchange market close
First Exchange Trading Date	09/12/2026	**Redemption Date**	09/06/2028
Final Fixing Date	01/06/2028	**Denomination**	CHF 1’000.00
Issue Price	100.00%	**Initial Fixing Level**	Official close of the respective Underlying on the Initial Fixing Date on the Related Exchange.
Final Fixing Level	Official close of the respective Underlying on the Final Fixing Date on the Related Exchange.	**Bonus Level**	116.00%
Bonus Amount	CHF 1’160.00	**Settlement Type**	Cash Settlement or Delivery of Underlying
Exchange Listing	SIX Swiss Exchange AG; traded on SIX Swiss Exchange - Structured Products	**Worst Performance**	For each Underlying the performance is calculated by dividing its Final Fixing Level by the respective Initial Fixing Level. The Worst Performance corresponds to the lowest of all such calculated values.
Currency Risk	The product is currency hedged at maturity, i.e. although the Initial Fixing Level is determined in the currency of the Underlying, the amounts determined in the Currency of the Underlying will be converted 1:1 into the Currency of the Product (Quanto)	**FX Rate**	The foreign exchange rate to be used for the conversion of the relevant Underlying currency into the Settlement Currency which appears on the Bloomberg page “BFIX” on the Final Fixing Date at 10 a.m. local time New York, for Underlyings with the Related Exchange located in the Asia-Pacific region at 4 p.m. local time Hong Kong, respectively.

Underlying	Type	Related Exchange	Bloomberg Ticker	ISIN	Initial Fixing Level (100%)*	Barrier Level (70.00%)*	Conversion Ratio
ABBOTT LABORATORIES	Share	NYSE	ABT UN	US0028241000	USD TBA	USD TBA	TBA**
INTUITIVE SURGICAL INC	Share	NASDAQ	ISRG UQ	US46120E6023	USD TBA	USD TBA	TBA**
KONINKLIJKE PHILIPS NV	Share	Euronext Amsterdam	PHIA NA	NL0000009538	EUR TBA	EUR TBA	TBA**

* will be determined on the Initial Fixing Date (levels expressed in percentage of the Initial Fixing Level).
**will be determined on the Final Fixing Date and equals the Denomination divided by the Initial Fixing Level of the respective Underlying which is expressed as absolute value in the relevant Underlying currency and converted where necessary into the Settlement Currency using the FX Rate.

The product terms provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the Issuer of the product may terminate the product early. These events are specified in the product terms and principally relate to the Underlying(s), the product and the Issuer of the product. For instance, these exceptional events are including but not exclusively limited to the cessation of an Underlying, tax events and the discontinuation of the Issuer’s ability to carry out the

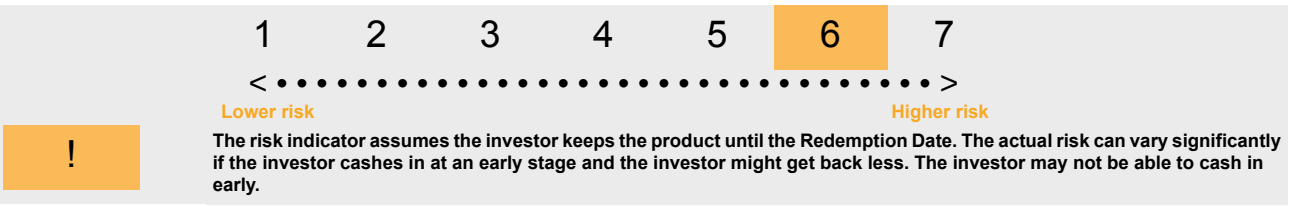

necessary hedging transactions. In the event of termination, the redemption amount may possibly be significantly below the purchase price. Even a total loss of the investment is possible. The investor also bears the risk that the product will be terminated at an unfavorable point in time and the investor might only be able to reinvest the redemption amount on less favorable terms.

Intended retail investor

- The product is aimed at retail investors who intend to form private assets and have a short-term investment horizon.
- The investor can bear losses up to the total loss of the investment amount and attaches no importance to products with capital protection.
- KNOWLEDGE & EXPERIENCE: Investors who have some knowledge of the financial instruments in question or moderate experience of financial markets.

2. What are the risks and what could the investor get in return?

Risk Indicator

The risk indicator assumes the investor keeps the product until the Redemption Date. The actual risk can vary significantly if the investor cashes in at an early stage and the investor might get back less. The investor may not be able to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay the investor.
We have classified this product as 6 out of 7, which is the second-highest risk class.
This rates the potential losses from future performance at a high level, and poor market conditions are likely to impact the capacity of the Issuer to pay the investor of the product.
The investor shall be aware of the currency risk. If the investor receives payments in a different currency, the final return that the investor gets will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
This product does not include any protection from future market performance so the investor could lose some or all of its investment.
In the case of delivery of the Underlying price losses may arise even after the Final Fixing Date until the Underlying is credited to the investors securities account.
If the Issuer is not able to redeem the investor what is owed, the investor could lose the entire investment.
For detailed information about all risks please refer to the risk sections of the legal documentation as specified in the section 'Other relevant information' below.

Performance Scenarios
What the investor will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		09/06/2028	
Example Investment:		CHF 10'000	
Scenarios		If the investor exits after 1 year	If the investor exits after 09/06/2028
Minimum	There is no minimum guaranteed return. The investor could lose some or all of the investor's investment.		
Stress	What the investor might get back after costs	CHF 1970	CHF 2190
	Average return each year	-80.33%	-63.65%
Unfavourable	What the investor might get back after costs	CHF 5950	CHF 4530
	Average return each year	-40.49%	-40.99%
Moderate	What the investor might get back after costs	CHF 9740	CHF 11600
	Average return each year	-2.61%	10.39%
Favourable	What the investor might get back after costs	CHF 11480	CHF 11600
	Average return each year	14.78%	10.39%

The figures shown include all the costs of the product itself, but may not include all the costs that the investor pays to the advisor or distributor. The figures do not take into account the investor‘s personal tax situation, which may also affect how much the investor gets back.
The stress scenario shows what the investor might get back in extreme market circumstances.
The scenarios shown represent possible outcomes calculated based on simulations.

3. What happens if the Issuer is unable to pay out?

The investor is exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency (inability to pay / over-indebtedness) or administrative order. A total loss of the investor’s capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising the investor on the product or selling this product to the investor may charge the investor other costs. If so, this person will provide the investor with information about these costs and how they affect the investor’s investment.

Cost over time
The tables show the amounts that are taken from the investor’s investment to cover different types of costs. These amounts depend on how much the investor invests, how long the investor holds the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- In the first year the investor would get back the amount that the investor invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10'000 is invested

	If the investor exits after 1 year	If the investor exits after the recommended holding period
Total costs	CHF 295	CHF 245
Annual cost impact (*)	3.0%	1.8% each year

(*) This illustrates how costs reduce the return of the investor each year over the holding period. For example it shows that if the investor exits at the recommended holding period the average return of the investor per year is projected to be 12.2% before costs and 10.4% after costs.
We may share part of the costs with the person selling the investor the product to cover the services it provides to the investor. It will inform the investor of the amount.

Composition of Costs

One-off costs upon entry or exit		If the investor exits after 1 year
Entry costs	2.5% of the amount the investor pays in when entering this investment. These costs are already included in the price the investor pays.	Up to CHF 245
Exit costs	Exit costs are estimated to be 0.5% of the investment before it is paid out to the investor. These costs are already included in the price the investor receives and are only incurred if the investor exits before maturity. If the investor holds the product until maturity, no exit costs will be incurred.	CHF 50

5. How long should the investor hold it and can the investor take money out early?

Recommended holding period: 09/06/2028 (until Redemption Date)
The objective of the product is to provide the investor with the redemption profile described under “1. What is this product?” above. This only applies if the product is held until maturity.
There are no possibilities to take the investor’s money out early other than to sell the product on the exchange where the product is listed or off-exchange.
Under normal market conditions, the price at which the investor may sell the product will depend on the market parameters prevailing at the time, which could put the invested amount at risk.
In unusual market situations, or in the event of technical faults/disruptions, a purchase and/or sale of the product can be temporarily hindered, or may not be possible at all.

6. How can the investor complain?

Any complaint regarding the person advising on, or selling, the product on the relevant website can be submitted directly to that person.
Any complaint regarding the product or the conduct of the Issuer of this product can be submitted to the following address: Swissquote Bank SA, Chemin de la Crétaux 33, 1196 Gland, Switzerland, structuredproducts@swissquote.ch, www.swissquote.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the final terms or the pricing supplement and the issuance and offering programme (including any supplements hereto) are published on the Issuer’s website www.swissquote.com. In order to obtain more detailed information – and in particular details of the structure of and risks associated with an investment in the product – the investor should read these documents.
Furthermore, the PRIIP Manufacturer created the KID after having made certain assumptions and exercised certain discretion with respect to calculations of key figures and performance scenarios and is going to reassess and adapt its assumptions as it deems appropriate from time to time.
